Harvard University | Introduction

Preferences in artificial intelligence - Semantic Scholar

The paper presents a focused survey about the presence and the use of the concept of preferences in Artificial Intelligence. Preferences are a central concept for decision making and have extensively been studied in disciplines such as economy, operational research, decision analysis.

Preference Handling in Combinatorial Domains: From AI to ...

In both individual and collective decision making, the space of alternatives from which the agent (or the group of agents) has to choose often has a combinatorial (or multi-attribute) structure.
