Acute Erythroid Leukemia | Archives of Pathology ...

Acute erythroid leukemia (AEL) is an uncommon type of acute myeloid leukemia (AML) and the criteria for establishing the diagnosis have evolved substantially over time. The first case report of AEL appears to have been contributed in 1912 by Copelli,¹ who described a hematologic disorder, erythromatosis.

Acute Erythroid Leukemia | Archives of Pathology ...

Acute erythroid leukemia (AEL) is an uncommon type of acute myeloid leukemia (AML), representing less than 5% of all cases. Acute erythroid leukemia is characterized by a predominant erythroid proliferation, and in the current World Health Organization (WHO) classification scheme there are 2 subtypes: erythroleukemia (erythroid/myeloid leukemia) and pure erythroid leukemia. Acute erythroid leukemia: a reassessment using criteria ...

Acute erythroid leukemia (AEL) is a rare form acute myeloid leukemia (AML), comprising less than 5% of cases of adult AML. The definition of AEL has undergone several revisions. Originally designated as M6 in the 1976 French-American-British (FAB) classification, its definition was refined in 1985 as an acute leukemia in which erythroid cells comprised at least 50% of all cells, and myeloblasts comprised at least 30% of the nonerythroid cells.

Acute erythroid leukemia - Wikipedia

Epidemiology. Acute erythroid leukemia is rare, accounting for only 3-5% of all acute myeloid leukemia cases. One study estimated an occurrence rate of 0.077 cases per 100,000 people each year. 64-70% of people with this condition are male, and most are elderly, with a

median age of 65.
