Patients with hyperuricemia or gout should undergo comprehensive evaluation for signs and symptoms of cardiovascular disease, and aggressive management of cardiovascular risk factors (ie, weight loss, reduction of alcohol intake, control of blood pressure, glucose, and lipids) should be undertaken as indicated.

[Chapter 23: Hyperuricemia and Gout - its.org](#)

Chapter 23 Monitoring patients for hyperuricemia at the time of other routine blood monitoring might help prevent further in-crases in uric acid levels and greater risks for gout.

[Chapter 74 - Gout and Hyperuricemia - Pharmacotherapy](#)

There is clear evidence that treatment of asymptomatic hyperuricemia is necessary to prevent acute gout attacks B. It may be caused by diuretic therapy C. Lifestyle changes, such as reduction in alcohol consumption, may correct elevated uric acid levels in patients with asymptomatic hyperuricemia D.

[Gout: Diagnosis and Management of Gouty Arthritis and ...](#)

Gout: Diagnosis and Management of Gouty Arthritis and Hyperuricemia; provides an overview of gout and its etiology, along with specific information about clinical features and diagnosis of gout. Management of acute gouty arthritis is covered in detail, as well as dietary and nonpharmacologic treatment approaches. Pharmacologic uric acid

Published in 2002 by the Japanese Society of Gout and Nucleic Acid Metabolism in 2002, the Guideline for the Management of Hyperuricemia and Gout was subsequently revised, and in January 2010 the Revised Guideline for the Management of Hyperuricemia and Gout was published.

[Gout and hyperuricaemia information | myVMC](#)

What is Gout and Hyperuricaemia Gout is a condition in which there are deposits of a chemical (sodium urate) in joints, causing arthritis, as well as in soft tissues and the urinary tract. Urate or uric acid is a chemical formed from the breakdown of purines DNA building blocks derived from protein.

[Chapter 3. Gout | Request PDF - ResearchGate](#)

Studies in human volunteers have shown that vitamin C reduces serum urate (SU) levels. The aim of this study was to determine the effects of vitamin C on SU levels in patients with gout.

[Gout and Hyperuricemia | Life Extension](#)

Gout is a form of arthritis in which excess uric acid forms crystals in joints and other tissues causing painful inflammation. Vitamin C, cherries, and other integrative interventions have been shown to decrease uric acid levels and the frequency of gout attacks.
