[How to Create a Rain Garden \(with Pictures\) -](#)
[wikiHow](#)

How to Create a Rain Garden. If your yard gets a lot of water during storms, rain gardens are a beautiful way to prevent runoff from causing oversaturation. Since rain gardens use native wetland plants, they can make an attractive.

[Rain garden - why and how to create one - Garden](#)
[Tips](#)

A rain garden is designed to keep the water where we need it, in our gardens, by capturing rainwater from a roof, driveway, and any other hard surfaces and directing it to a location in our yards where it can soak in. Basically a rain garden started with creating a depression in the yard, filling it with good soil, then adding plants that can handle both dry and wet periods.

[Creating a Rain Garden](#) Do you want a garden that's easy to install, looks good year-round, requires little maintenance, and helps prevent water pollution? Rain gardens are shallow depressions designed to soak up water and support trees, shrubs, and flowers that tolerate both wet and dry conditions. Often located near gutter downspouts or places where water puddles, rain gardens can also be

[How to Build a Rain Garden in Your Yard - Family](#)
[Handyman](#)

Create the rain garden by building a berm in a low spot in the yard, then build swales to channel runoff from the gutters and higher parts of the yard. The water is then absorbed into the soil through the network of deep plant roots. Use a mix of plants adapted to your area and to the different water depths.
