Abstract Search for information is no longer exclusively limited within the native language of the user, but is more and more extended to other languages. This gives rise to the problem of cross-language information retrieval (CLIR), whose goal is to find relevant information written in a different language to a query. In addition to the [Cross-Language Information Retrieval - ResearchGate Feature Article: Cross-Language Information Retrieval 19](#) [Cross-Language Information Retrieval Jian-Yun Nie](#) The first two approaches are quite straightforward.

[Cross-Language Information Retrieval \(CLIR\) Track Overview](#)

2 Overview of CLIR There are three main ways in which cross-language information retrieval approaches attempt to "cross the language barrier" through query translation, or document translation, or both.
