killer as it causes very few symptoms. The risk of ovarian  
cancer increases with age, and family history of the disease

### [About Gynecologic Cancers - Foundation for Women's Cancer](#)

About Gynecologic Cancers: Commonly Asked Questions.  
What are gynecologic cancers? Gynecologic cancers are  
the uncontrolled growth and spread of abnormal cells  
originating in the female reproductive organs, including  
the cervix, ovaries, uterus, fallopian tubes, vagina and  
vulva. What causes gynecologic cancers? There are many  
factors that cause gynecologic cancers. Medical research

### [Gynecologic Cancers - cancer.northwestern.edu](#)

The five gynecologic cancers begin in different places  
within a woman's pelvis, which is the area below the  
stomach and in between the hip bones. Each gynecologic  
cancer is unique, with different signs and symptoms,  
different risk factors and different prevention strategies.  
All women are at risk for gynecologic cancers, and risk  
increases with age. When gynecologic cancers are found  
early

### [Gynecologic Cancer | Conditions and Treatments | UCSE...](#)

Gynecologic Cancer Every six minutes, an American  
woman is diagnosed with gynecologic cancer, including  
cervical, endometrial, ovarian, peritoneal, tubal, vaginal  
and vulvar cancers. Endometrial cancer of the uterus,  
sometimes referred to as uterine cancer, is the most  
common cancer of the reproductive system, while ovarian  
is the fifth most common cause of cancer deaths in  
women.

### [Gynecologic Cancers Risk Factors | Prevention | University ...](#)

Gynecologic Cancers Risk Factors. A risk factor is  
anything that changes your chance of getting a disease  
such as cancer. Different cancers have different risk  
factors. For example, exposing skin to strong sunlight is a  
risk factor for skin cancer. Smoking is a risk factor for  
many cancers. But having a risk factor, or even several,  
does not mean that you will get the disease. Cervical  
Cancer
