Muscular System - Muscles of the Human Body

Muscular System. The muscular system is responsible for the movement of the human body. Attached to the bones of the skeletal system are about 700 named muscles that make up roughly half of a person's body weight. Each of these muscles is a discrete organ constructed of skeletal muscle tissue, blood vessels, tendons, and nerves.

Muscular System Anatomy, Diagram & Function | Healthline

The primary job of muscle is to move the bones of the skeleton, but muscles also enable the heart to beat and constitute the walls of other important hollow organs.

Newsletter human body maps

human muscle system | Functions, Diagram, & Facts ...

Human muscle system, the muscles of the human body that work the skeletal system, that are under voluntary control, and that are concerned with movement, posture, and balance. Broadly considered, human muscle like the muscles of all vertebrates is often divided into striated muscle (or skeletal muscle), smooth muscle, and cardiac muscle.

Muscular System : Human Anatomy
