CA asks you to create new key pair, but old key is in productive use, if you replace it directly, it will impact productive usage. You can follow the steps in note 1178155 to generate a new key pair without removing the old key pair.

[FAQ - SSL on ABAP Server - Security and Identity ...](#)
Then check that the STRUST configuration for the SSL Server PSE is completed as per note 510007. Finally check the dev_w* traces for the successful loading of sapcryptolib. Finally check the dev_w* traces for the successful loading of sapcryptolib.

[Enabling SSL \(HTTPS\) on SAP Gateway | SAP Blogs](#)
CN=*dhcp.wdf.sap.corp is a wildcard certificate. Actually it's not a good idea to use server-specific (non-wildcard) certificates in addition that's only required when your CA is refusing to issue wildcard SSL server certificates.

[STRUST transaction code - Tech Community](#)

Hi, Transaction STRUST is for the SAP System 'Trust Manager'(see SAP- Help info below). Password is obtained after verifying the SAP Web AS's digital-Delete Certificate Error Strust - Tech Community
Thanks Snow, I saw that, and the one problem with that, is that it only removed it from the file level, and not the database level. So when you remove it from the file level, the status turns red for that particular section, and I am still unable to delete the certificate from Strust.

[Export and Import of Application Certificate \(SAP Library ...](#)

The SAP Cryptographic Library is installed on the application server. Export Application Certificate. For the export of the application certificate, you use the trust manager (transaction STRUST): 1. Start the transaction STRUST. 2. Choose SNC (SAPCryptolib) and select the keystore. Information about the

[Generate SSL certificates with OpenSSL for SAP systems ...](#)

Hello, It is possible to generate certificates with Alternative Subject Names with transaction STRUST from Netweaver 7.31. The trick is to enter 2 different CN separated by comma in the DN field.

How to Configure the SAP Secure Network Communication Protocol

How to Configure the SAP Secure Network Communication Protocol Go to transaction STRUST to export the SAP server PSE certificate. 6. 7. Double-click the SAP server PSE certificate and click the **E x p o r t C e r t i f i c a t e** icon. 8. Save the SAP server PSE certificate under the following directory: /server/ bin/sec 9. Go to transaction SNC0. 10.

Creating the PSEs and Certificate Requests (SAP Library ...)

The command line below creates the SAP Web Dispatcher's SSL server PSE and certificate request using the following information: The environment variable SECUDIR is set to C:\Program Files\SAP\SAPWebDisp\sec.

How to replace the SSL server Standard PSE? | SAP Blogs

CAs around the world only sign certificate requests with key length equal (or higher than) 2048 bits. If you have a PSE with key length equal to 1024 bits, then you cannot create such certificate request (with 2048 bits).
