Soil and climate change European Environment Agency

Soil and climate change Soil is an important and often neglected element of the climate system. It is the second largest carbon store, or "sink", after the oceans. Restoring key ecosystems on land, and a sustainable use of the land in urban and rural areas, can help us mitigate and adapt to climate change.

M rckelbach: Ch. 14 - FLEABYTE

May 8, 2001 Chapter 14. Doing as the Romans do 2. Social history is history from the bottom up, a history of how people feel and react to ever changing circumstances.
