## [Spasticity Causes, Symptoms, and Treatments - WebMD](#)

Spasticity is a muscle control disorder that is characterized by tight or stiff muscles and an inability to control those muscles. In addition, reflexes may persist for too long and may be too

## [Managing Spasticity with a Focus on Rehabilitation](#)

Spasticity develops during the 4th stage, 1-12 months after the injury, when the early management of spasticity will also begin. (17) (17) Any delays in treating the spastic syndrome creates a pathological motor pattern which constitutes the maladaptation of the brain and spinal cord to the changes resulting from bodily injury, thus increasing rehabilitation time and minimize end results.

## [The management of spasticity in adults | The BMJ](#)

Spasticity is a frequent and debilitating feature of common neurological conditions such as stroke, multiple sclerosis, and traumatic brain and spinal cord injuries. The disorder is often associated with pain and discomfort and increased care needs. Spasticity is difficult to manage and requires a

## [About The Spasticity Management Clinic - uhm.ca](#)

Spasticity is a debilitating disorder of the central nervous system that's often experienced by people who have had a stroke or who have acquired brain injury, multiple sclerosis, cerebral palsy or a spinal cord injury.

## [Spasticity Management Clinic | West Park Healthcare Centre](#)

Description: West Park's Spasticity Management Clinic is the largest adult spasticity program in the country and features leading experts in spasticity management.

## [Spasticity - Physiopedia](#)

Definition The most well-known and referenced description of spasticity is the physiological definition proposed by Lance in 1980: 'Spasticity is a motor disorder characterised by a velocity-dependent increase in tonic stretch reflexes (muscle tone) with exaggerated tendon jerks, resulting from hyperexcitability of the stretch reflex, as one
