The Africa Development Forum Series was created in 2009 to focus on issues of significant relevance to Sub-Saharan Africa's social and economic development. Its aim is both to record the state of the art on a specific topic and to contribute to ongoing local, regional, and global policy debates. It is designed specifically to provide

practitioners, scholars, and students with the most up-to-

**Demographic Transition Model - ThoughtCo**

The demographic transition model seeks to explain the transformation of countries from having high birth and death rates to low birth and death rates.

**Demographic transition - Wikipedia**

The demographic transition model, in isolation, can be taken to predict that birth rates will continue to go down as societies grow increasingly wealthy; however, recent data contradicts this, suggesting that beyond a certain level of development birth rates increase again.

**The Demographic Transition Definition in Sociology**

Demographic transition is a model used to represent the movement of high birth and death rates to low birth and death rates as a country develops from a pre-industrial to an industrialized economic system. It works on the premise that birth and death rates are connected to and correlate with stages of industrial development. The demographic transition model is sometimes referred to as "DTM"
